Overview

Versatile Agricultural Performance

This 10HP diesel power tiller is a semi-automatic, self-propelled cultivator engineered for both paddy field and dry land operations. Featuring direct gear transmission and a durable cast iron output gearbox, it provides a cost-effective solution without compromising on working performance. Its ergonomic design minimizes vibration and ensures ease of operation for commercial-grade agricultural tasks.

Technical Specifications

Engine Power

10 HP

Horsepower

Engine Type	178F Diesel Engine
Starting Method	Electric Start
