

10HP Industrial Air Compressor Pump

This 10HP compressor pump is designed for demanding industrial applications. The robust pump features a durable cast iron construction for extended life and delivers high air flow and pressure for efficient operation.

Overview

High-Performance Industrial Compressor Pump

This 10HP two-stage compressor pump is engineered for demanding industrial applications requiring reliable air compression. Featuring a robust four-cylinder design, it delivers consistent high-pressure output suitable for powering a wide range of pneumatic tools and heavy-duty equipment. Built with durability in mind, this unit is an ideal solution for professional workshops and manufacturing environments seeking efficient, long-lasting performance.

Performance

Motor Power

10 HP

Motor Power

Air Displacement

955 L/min

Air Displacement

Working Pressure

12 bar

Rotational Speed

620 RPM

Technical Details

Cylinder Count

4

Net Weight

130 kg

Dimensions

2560 x 790 x 650 mm

Packaging Info

4 sets per package

Features

Construction Materials

Cast Iron, Two-Stage Design
