Overview

High-Performance Power Protection

This 10KVA high-frequency online uninterruptible power supply (UPS) is engineered to provide reliable, continuous power for critical office infrastructure, including servers, computers, and networking equipment. Utilizing advanced online double-conversion technology, it ensures seamless power transfer during outages while protecting sensitive electronics from surges, spikes, and voltage fluctuations. The unit features an intuitive LCD interface for real-time monitoring and advanced battery management to ensure extended runtime and operational stability.

Technical Specifications

Capacity

10 KVA
Capacity

Technology

High-Frequency Online Double Conversion

Connectivity & Interfaces

Communication Ports

USB, RS232

Expansion Options

SNMP card slot

Features

Key Features

- LCD status display
- Bypass maintenance switch
- Cooling fans
- Battery connection terminals
- Input/Output wiring terminals
- Mobility wheels

Certifications

CE

Noise Level

Below 40dB
