

10kW Electric Generator

This 10kW generator is designed for general machinery applications. The generator provides reliable power output and durable performance in industrial settings, suitable for a variety of applications requiring a 10kW power source.

Overview

High-Performance 10kW Industrial Generator

This 10kW electric generator is engineered for reliable power output and durable performance in demanding industrial settings. Designed for versatility, it supports both single-phase and three-phase configurations to suit a wide range of machinery applications. With flexible voltage and frequency options, this dynamo provides a stable power source for professional operations requiring consistent energy delivery.

Performance Metrics

Rated Power

10 kW

Rated Power Output

Rated Rotation Speed

3000 r/min

Electrical Specifications

Voltage Options

- 115V
- 230V
- 400V

Phase Configuration

Single Phase • Three Phase

Frequency

50Hz, 60Hz

Design Features

Brush Type

Brushed
