

# 10kW Electric Welding Power Supply

This 10kW electric welding power supply is designed for industrial applications. Its robust construction and efficient cooling system ensure reliable and stable power output for consistent welding performance.

## Product Overview

### High-Performance 10kW Welding Power Solution

This 10kW electric welding power supply is engineered for demanding industrial applications requiring a stable and reliable energy source. It combines power generation capabilities with dedicated welding outputs, featuring a robust finned housing for superior thermal management. Designed for versatility, it provides consistent performance across various welding setups and environmental conditions.

## Power Generation

### Rated Power Output

**3 kW**

Rated Power

### Rated Voltage

- 220V
- 240V

### Rated Frequency

- 50 Hz
- 60 Hz

## Welding Specifications

### Welding Rated Current

**300 A**

Rated Current (DC)

### No-Load Voltage

65 V

## Design & Construction

### Cooling Method

Finned housing for efficient heat dissipation

### Application Scope

Industrial, Self-Contained Unit, Power Generation, Electric Welding
