Product Overview

High-Performance 10kW Gasoline Generator

This heavy-duty open frame gasoline generator is engineered for professional-grade reliability and extended operation. Featuring a 22HP engine and a 100% copper coil alternator, it delivers a consistent 10kW output. With a large 45L fuel tank, it provides 8 hours of uninterrupted power, making it an ideal solution for construction sites, outdoor events, and emergency backup.

Performance Metrics

Rated Power Output

10 kW

Max Power Output

22 HP

Engine Power

Runtime & Fuel 8 hours

Fuel Tank Capacity 45 L

Construction & Design

Frame Material 32mm steel pipe

Portability 10-inch iron hub wheels, Dual side handles, Two-person lift design

Technical Specifications

Phase Configuration

- Single-phase
- Three-phase

Optional Features

ATS Ready • Remote Control

Alternator Construction

100% Copper Coil
