Product Overview

Smart Constant Temperature Heating

This 10L digital constant temperature gas water heater is engineered to deliver reliable, on-demand hot water with precise temperature stability. Featuring a sleek, modern design with a glass front panel and intuitive digital controls, it ensures a consistent and comfortable water supply for residential use. The unit incorporates essential safety features, including flame failure detection and overheat protection, while maintaining energy-efficient operation.

Performance Specifications

Rated Heat Loading

20 KW

Rated Heat Loading

Hot Water Capacity

10 kg/min

Capacity

Rated Gas Pressure Requirements

| Gas Type | Pressure |
|----------|----------|
| LPG | 280 Pa |
| NG | 2000 Pa |
| TG | 1000 Pa |

Supported Gas Types

LPG, NG, TG

Installation & Dimensions

| | |
|---------------------------|--------------------|
| Model Number | JSQ20-10HB |
| Flue Pipe Diameter | 60 mm |
| Applicable Water Pressure | 0.02MPa - 0.8MPa |
| Product Dimensions | 578 x 368 x 122 mm |
