

1.0L Espresso and Cappuccino Machine with Milk Frothing

This espresso machine features a 15 bar pump and a 1.0L water tank. It uses pods or ground coffee with a stainless steel filter holder and includes a steam function for frothing milk to make cappuccinos.

Product Overview

Professional Espresso Performance

This compact espresso and cappuccino machine is designed to deliver café-quality coffee with ease. Featuring a powerful 15-bar pump and a versatile brewing system, it supports both coffee pods and ground coffee for maximum convenience. With a quick 35-second brewing time and an integrated steam wand for milk frothing, it is an ideal solution for preparing authentic espresso and cappuccino drinks efficiently.
