Overview

Efficient Hot Water Solution

This 10L flue-type gas water heater is designed for domestic use, providing reliable hot water on demand. Featuring adjustable gas and water flow controls, it allows for precise temperature regulation to suit seasonal needs. The unit incorporates essential safety features, including flame failure and overheat protection, making it a dependable choice for residential applications where space is at a premium.

Technical Specifications

Rated Gas Pressure

- 280 Pa
- 2000 Pa
- 1000 Pa

Rated Heat Loading	20 KW
Rated Hot Water Capacity	10 kg/min
Compatible Gas Types	LPG, NG, TG

Installation & Dimensions

Flue Pipe Diameter	110 mm
Applicable Water Pressure	0.02MPa - 0.8MPa
Product Dimensions	550 x 330 x 185 mm

Key Features

Safety Features

Flame Failure Protection • Overheat Protection • Flue Exhaust System

Control Interface

2 Seasonal

Adjustable Modes
