

10L Portable Air Dehumidifier with Rotary Compressor

This portable dehumidifier removes up to 10L of moisture per day. It features a rotary compressor for quiet operation and includes wheels for easy movement.

Overview

Efficient 10L Portable Dehumidifier

This portable air dehumidifier is designed for efficient moisture removal in home and office environments, featuring a high-quality rotary compressor for low-noise operation. It utilizes eco-friendly R134a refrigerant and offers a dehumidifying capacity of 10-12 liters per day. Equipped with integrated wheels and a compact design, it is easy to move between rooms to maintain optimal humidity levels.

Technical Specifications

Refrigerant

R134a

Power Supply

230V / 50Hz

Rated Current

0.86 A

Compressor Type

Rotary Compressor (Low Noise)

Features & Functions

Core Functions

- Electrical control system
- Automatic defrosting function
- Water full alarm with auto shut-off
- 0-24 Hours programmable timer
- External drain connection support
- Washable air filter

Optional Features

Negative Ion, Photocatalyst, Remote Controller

Design & Portability

Design Attributes

- Compact portable design
- Integrated caster wheels for easy movement
- Removable large capacity water tank
- Classic white finish

Control Panel

The unit features an intuitive control panel with timer, fan speed, and mode settings, alongside easy-roll casters for portability.

User Interface

- High/Low fan speed adjustment
- Anion function toggle
- Cleanse mode
- Mode selection
- Timer setting

Model Comparison

Model Variants

Model	Capacity	Rated Current
CLDD-10M	10L / Day	0.86A
CLDD-12M	12L / Day	0.96A
