Product Overview

Versatile Portable Cooling & Warming

This 10-liter thermoelectric cooler and warmer provides a flexible solution for keeping beverages and food at optimal temperatures during travel. Utilizing advanced semiconductor technology, it efficiently cools down to 18-25°C below ambient temperature or heats up to 60°C. With dual power compatibility for 12V vehicle outlets and standard AC power, it is an ideal companion for road trips, camping, and office use.

Technical Specifications

Power Consumption

40 W Minimum Power	60 W Maximum Power
------------------------------	------------------------------

Temperature Performance

Function	Performance Range
Cooling	18 to 25°C below ambient
Heating	50 to 60°C

Capacity	10 L
Can Capacity	16 cans
Power Compatibility	12V DC, 110V AC, 230V AC

Physical Dimensions

Unit Dimensions	45cm (D) x 21.5cm (W) x 31cm (H)
Net Weight	3.6 kg

Certifications & Compliance

Compliance Standards

UL • CE • RoHS • REACH • LFGB • E-MARK • TUV

Logistics

Container Loading (20'/40'/40'HQ)
