

1.0L Stainless Steel Electric Kettle with Automatic Shut-Off

This stainless steel electric kettle is designed for rapid boiling. It features automatic shut-off, a cordless design, and a concealed heating element for easy cleaning.

Product Overview

Compact Professional Electric Kettle

This 1.0L stainless steel electric kettle combines efficiency and safety for modern workspaces or hospitality environments. Featuring a concealed stainless steel heating element, it ensures rapid boiling while preventing mineral buildup. Equipped with automatic shut-off and dry-boil protection, this appliance offers reliable performance and ease of use in any professional setting.
