

# 10x25A Camouflage Telescope for Outdoor Observation

This compact and lightweight 10x25A telescope features a camouflage finish and is designed for outdoor observation. It has a 25mm objective lens for enhanced light gathering and 10x magnification for detailed viewing.

## Product Overview

### Professional Outdoor Observation

The 10x25A Camouflage Telescope is a compact and lightweight optical instrument engineered for versatile outdoor use. With its 10x magnification and 25mm objective lens, it delivers clear, detailed views suitable for hiking, bird watching, and wildlife observation. The multi-coated optics ensure enhanced brightness, while the rugged construction provides the reliability required for challenging environments.

## Optical Performance

### Magnification

**10 x**
