

# 10x38mm 1000V DC Solar Fuse Holder

This DC fuse holder is designed to prevent overcurrent in solar systems. It is widely used in high and low voltage power distribution, control systems, and electrical equipment as a short circuit and overcurrent protector.

## Professional Solar Protection

This 1000V DC solar fuse holder is a high-performance component designed to safeguard solar photovoltaic systems against overcurrent and short circuit risks. Built with flame-retardant and heat-resistant materials, it ensures consistent operation and long service life in harsh environments. Featuring an intuitive LED indicator for fuse status and a user-friendly design, it is an essential safety component for residential and commercial solar installations.

## Technical Specifications

Voltage Rating	1000 V
Compatible Fuse Size	10x38mm
Current Capacity	10A - 30A

## Features

### Safety Indicators

LED Status Indicator • Flame Retardant • Heat Resistant • Oxidation Resistant

### Compliance & Certifications

TUV, CE, IEC 60269-6

## Mechanical Details
