

10x38mm 32A 690V Cylindrical Fuse

This cylindrical fuse measures 10x38mm and is rated for 32A and 690V. It is designed to quickly interrupt circuits during overloads or short circuits, preventing equipment damage and reducing electrical hazards.

Product Overview

Reliable Circuit Protection

This cylindrical contact cap fuse is engineered for robust circuit protection in industrial, commercial, and residential electrical systems. Measuring 10x38mm, it provides consistent performance in transmission and distribution applications, effectively safeguarding sensitive equipment against overloads and short circuits. Its durable construction ensures a long operational lifespan and rapid circuit interruption during fault conditions.

Physical Characteristics

Physical Dimensions	10x38mm
Fuse Type	Cylindrical contact cap fuse

Product Details

Protection Capabilities

- Overcurrent protection
- Short circuit protection
- Rapid circuit interruption

Model Number	RT18-32T
Suitable Applications	Industrial, Commercial, Residential, Transmission, Distribution
