

11-Liter Electric Oven

This electric oven features a temperature range of 65-250°C and an 11-liter capacity. Supporting 110V/240V voltage and 1300W power, it operates at 50/60Hz.

Product Overview

Compact and Efficient Cooking Solution

This 11-liter electric oven is designed for efficient, space-saving cooking in professional or compact environments. With a robust 1300W heating element, it delivers consistent performance across a wide temperature range, making it suitable for various culinary tasks. The unit is engineered for versatility, supporting both 110V and 240V power supplies to accommodate different electrical standards.
