

110-130 HP Wheel Tractor for Agriculture

This wheel tractor delivers between 110 and 130 HP, making it suitable for a variety of agricultural tasks. It is equipped with a cabin, heavy-duty tires, and a hydraulic system for operating implements such as plows and tillers.

Overview

High-Performance Wheel Tractor

This 110-130 HP wheel tractor is engineered for professional agricultural operations, offering robust performance for tasks like plowing, tilling, and planting. Designed with operator comfort in mind, it features an enclosed cabin and a heavy-duty chassis to ensure long-term durability in field conditions. The integrated hydraulic system and rear three-point hitch provide the versatility required for managing a wide range of agricultural implements.
