

1105 Model Single-Cylinder Diesel Engine

This single-cylinder diesel engine is designed for both agricultural machinery and industrial applications. It features robust construction and reliable performance, making it suitable for powering equipment like water pumps and generators.

Overview

High-Performance Single-Cylinder Diesel Engine

The 1105 model is a robust single-cylinder diesel engine engineered for reliability and efficient performance in demanding environments. Delivering 18HP at 2200RPM, this engine is perfectly suited for powering agricultural machinery, water pumps, generators, and small tractors. Its durable construction ensures consistent operation across various industrial and field applications.

Technical Details

Engine Type	Single-Cylinder Diesel
Model Number	1105
Gear Form Number	1117

Applications

Suitable Applications	Agricultural Machinery, Water Pumps, Generators, Small Tractors, Industrial Equipment
