

110mm Segmented Diamond Saw Blade

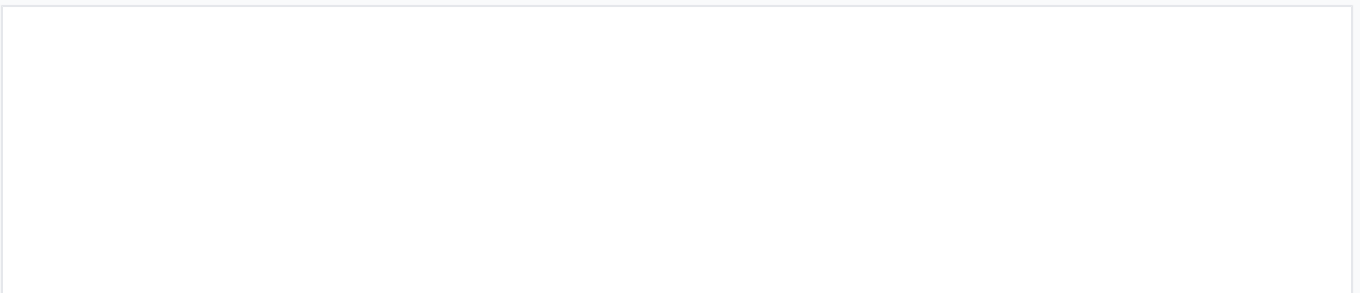

This is a super hard segmented diamond sintered blade. It is designed for high performance, great durability, and high efficiency.

ADDITIONAL IMAGES

Overview

High-performance segmented diamond blade designed for general-purpose cutting.

Professional Cutting Performance

This 110mm segmented diamond saw blade is engineered for high-performance, general-purpose cutting tasks. Featuring a sintered construction, it offers excellent durability and efficient material removal for a variety of construction and industrial applications. Designed to maintain high speed and precision, this blade provides a reliable solution for clean, consistent results.

Technical Specifications

Super hard sintered blade construction optimized for efficient material removal.

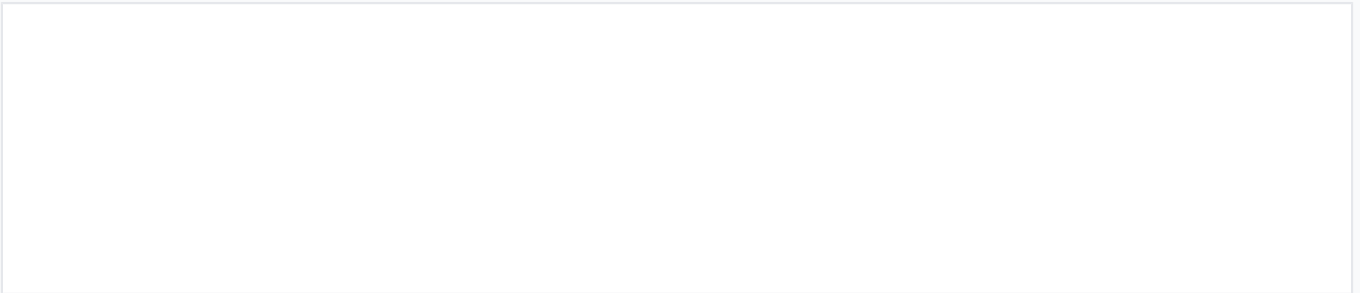

Maximum RPM

14500 RPM

Max Speed

Blade Diameter	110 mm
Arbor Size	20 mm
Blade Thickness	1.8 mm
Maximum Linear Speed	80 m/s
Blade Type	Segmented, Sintered, General Purpose

Logistics

Standard packaging configuration for efficient transport and storage.

Packaging Details

- Single chip packaging
- 10 pieces per box
