

# 115L Glass Door Beverage Cooler

This compressor beverage cooler features a glass door for displaying contents. It cools quickly and offers optional customization.

## Overview

### Professional 115L Beverage Cooling Solution

This 115L glass door beverage cooler is designed for high-performance cooling in commercial and hospitality environments. Featuring a rapid-chill compressor system and a transparent glass door, it provides an attractive display for drinks while maintaining consistent internal temperatures. With adjustable shelving and a durable high-elastic door seal, it offers a versatile and reliable solution for hotels, bars, and professional catering needs.

## Key Features

### Performance Highlights

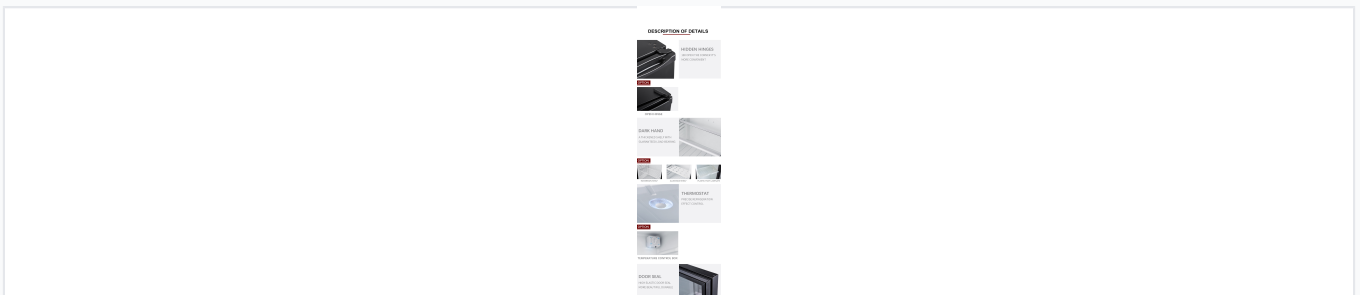

**115 L**

Capacity

**180 °**

Door Opening Angle

## Technical Design

The unit features precise temperature control, high-elastic door seals, and multiple heavy-duty shelving options.

### Door & Seal

- Transparent glass door for product visibility
- High-elastic door seal for durability and insulation
- Hidden hinges for seamless integration
- 180-degree corner opening for easy access

### Cooling Technology

Compressor-based cooling for fast and stable refrigeration

### Temperature Control

Manual thermostat with precise refrigeration effect control box (Low, Medium, Off settings)

## Storage & Shelving

### Shelf Configurations
