

115mm Abrasive Cutting Disc

This is a type 27 cutting disc with dimensions 115x1x22.2mm. It is designed for cutting stainless steel, steel, stahl, acier and acero materials.

Product Overview

High-Performance Abrasive Cutting Disc

This Type 27 cutting disc is engineered for precision and efficiency in professional metalworking environments. It is specifically formulated to be iron-free, making it an ideal choice for processing stainless steel, as well as various grades of steel. With a design focused on cool cutting and extended tool life, this 115mm disc delivers consistent results for demanding industrial applications.

Technical Specifications

Disc Dimensions

115 mm

Diameter

1 mm

Thickness

22.2 mm

Bore

Performance Ratings

13300 rpm

Max RPM

80 m/s

Max Speed

Certifications & Compliance

ISO9001:2000, MPA EN12413

Material Compatibility

Compatible Materials

- Stainless Steel (INOX)
- Steel
- Stahl
- Acier
- Acero

Material Composition

Iron-Free
