

115mm Diamond Cutting Blade for Angle Grinders

This diamond cutting blade is designed for industrial applications. It features a 115mm diameter with a 22.2mm bore and is suitable for cutting tile, ceramic, and stone.

Product Overview

Industrial Diamond Cutting Blade

This high-performance diamond cutting blade is engineered for professional industrial applications, offering precision and durability. Designed for use with angle grinders, it provides a clean, efficient cut across challenging materials like tile, ceramic, and stone. Built to meet rigorous safety standards, this tool is the reliable choice for demanding construction and masonry tasks.

Technical Specifications

Blade Diameter	115 mm
Bore Size	22.2 mm
Blade Width	10 mm
