Product Overview

Industrial Rib Tire Performance

The 11L-16 F3 industrial tire is engineered for demanding material handling and industrial applications. Designed with a specialized rib pattern, it offers enhanced stability and reduced rolling resistance for improved operational efficiency. Its robust construction ensures significant durability and wear resistance, making it a reliable choice for heavy-duty equipment operating on various surfaces.

Technical Specifications

Tire Size	11L-16
Tread Pattern	F3 Industrial Rib
Application Suitability	Construction, Agriculture, Material Handling, Industrial Vehicles
