Overview

Professional 12-Channel Power Mixer

The PS-1200XL is a professional 12-channel power mixer designed for high-performance audio environments. It features a unique folding design for easy transport and protection, integrated LED level displays for precise monitoring, and a robust 350W+350W output at 8 ohms. With built-in DSP effects, a microphone preamplifier, and USB recording capabilities, this mixer provides a comprehensive solution for live sound reinforcement and recording applications.

Performance Metrics

Key Technical Metrics

350 W

Main Power Output per Channel

90 dB

S/N Ratio

0.005 %

Total Harmonic Distortion (T.H.D.)

Audio Capabilities

Input/Output Configuration

- 8 Mono Channels
- 2 Stereo Channels
- 2 Group Main Output
- 4 Group AUX Output
- 2 Group Stereo Foldback

Equalization Parameters

Band	Frequency	Range
HI	12 kHz	±15dB
MID	2.5 kHz	±15dB
LOW	80 Hz	±15dB

Technical Specifications

Frequency Response	20Hz-20KHz
