Overview

High-Efficiency Concrete Mixer

This heavy-duty concrete mixer truck is engineered for reliable performance in both short and long-distance construction transport. Featuring a robust 6x4 drive configuration and a 12 cubic meter mixing drum, it provides the stability and capacity required for medium to large-scale infrastructure projects. The vehicle is equipped with a high-performance engine and advanced hydraulic systems to ensure consistent mixing quality and operational longevity on demanding job sites.

Performance & Capacity

Drum Capacity

12 m³

Drum Capacity

59 %

Filling Rate

Operational Speeds

| Metric | Value |
|-------------------|-------------------------|
| Input Speed | e2.8m ³ /min |
| Output Speed | e1.2m ³ /min |
| Max Driving Speed | 90 km/h |

Vehicle Dimensions & Weight

Dimensions & Loading

| Specification | Value |
|----------------------------|-----------------------|
| Overall Dimensions (LxWxH) | 9800 x 2490 x 3980 mm |
| Wheelbase | 4350 + 1350 mm |
| Tare Weight | 16000 kg |
| Payload | 8870 kg |

Technical Specifications

Engine Details

- 6-stroke direct injection
- 6-cylinder in-line
- Water cooling
- Turbo-charging and inter-cooling
- 336 Horsepower
- Euro II Emission Standard

Drum Construction

- Material: Q345 Carbon Steel
- Drum Thickness: 6mm
- Blade Thickness: 4mm
- Water Tank Volume: 400L

Drivetrain Configuration

6x4 Drive, Left Hand Drive, 10 Forward Gears, 2 Reverse Gears
