Overview

High-Performance Air-Cooled Diesel Engine

This 12 HP air-cooled diesel engine is engineered for reliability, efficiency, and durability in demanding industrial environments. Featuring a direct injection system for optimal fuel combustion, it delivers smooth operation with low noise and vibration levels. Designed for versatility, this robust power unit is an ideal choice for generators, water pumps, and various other industrial machinery applications.

Technical Specifications

Rotation Speed

- 3000
- 3600

Rated Power Output

12 HP

Cooling System

Air-Cooled

Engine Configuration

Single-cylinder, direct injection

Performance & Quality

Warranty

1 Year

Warranty Duration

Included Accessories

- Operation Manual
- Technical Maintenance Manual
- Tool Kit

Certifications

CE, ISO 9001
