Product Overview

Professional Performance Cutting Disc

This 12-inch metal cutting disc is engineered for high stability and precision on table and fixed chop saw machines. Featuring premium aluminum oxide grain and a reinforced resinoid bond, it delivers clean, burr-free cuts with minimal friction. Designed for efficiency, the disc offers an excellent balance between high-speed cutting performance and long operational life, making it a reliable choice for professional fabrication environments.

Technical Specifications

High-performance T41 metal cutting disc featuring single-net construction for durability.

Max Operating Speed

80 m/s
Velocity

5100 rpm
RPM

Dimensions	12 in x 1/9 in x 1 in
Abrasive Material	Aluminum Oxide
Bond Type	Reinforced Resinoid (BF)
Hardness	R-Grade

Compliance and Quality

Safety Compliance

Reinforced Fiberglass • Low Iron/Sulfur/Chlorine

Certifications

MPA EN12413, ISO 9001, ISO 14001, OHSAS 18001

Logistics

HS Code

68042210

OEM Service

Yes
