

12-inch 150W Active Subwoofer

This active subwoofer features a 12-inch loudspeaker and a power output of 150W. It is designed to enhance low-frequency performance in home audio systems.

Product Overview

High-Performance Active Subwoofer

This 12-inch active subwoofer is engineered to deliver deep, impactful bass response for both home theater and music applications. Featuring a high-excursion driver housed in a high-density enclosure, it minimizes unwanted resonances for cleaner sound. The integrated amplifier offers essential controls, including adjustable crossover frequency and volume, making it a versatile addition to any stereo or multi-channel audio system.
