

1/2-Inch Keyless Drill Chuck with Locking System

This 1/2-inch keyless drill chuck features a locking system and a single metal sleeve. The keyless chuck is designed for use with various power tools, providing a secure and reliable grip on drill bits and other accessories.

Overview

Professional Grade Keyless Chuck

This 1/2-inch keyless drill chuck is engineered for high-performance professional applications, featuring a specialized locking system to ensure maximum bit security. The integrated audible and tactile feedback system provides users with confidence that the tool is properly tightened before use. Designed with durability in mind, its compact metal sleeve construction withstands high-vibration environments without loosening.

Technical Features
