Product Overview

High-Efficiency 12-Inch DC Pedestal Fan

This advanced 12-inch pedestal fan utilizes a brushless digital DC motor to deliver powerful, whisper-quiet airflow while significantly reducing energy consumption. Designed with 3D oscillation capabilities and multiple smart wind modes, it ensures optimal air circulation in any environment. Its versatile features, including touch control, remote operation, and an optional battery pack, make it an ideal professional cooling solution for both home and office settings.

Performance Metrics

Key Performance Indicators

30 W

Power Consumption

6.5 m/s

Max Wind Speed

35 dB

Noise Level

Technical Specifications

Hardware Details

Feature	Specification
Input Voltage	DC 12V 3A
Speed Settings	12 Levels
Timer	1-16 Hours
Horizontal Oscillation	30°, 60°, 120°
Vertical Tilt	Up 90°, Down 10°

Wind Operating Modes

Normal, Natural, Sleep

Advanced Features

Product Capabilities

- Brushless DC Motor for energy efficiency
- Touch panel with digital LED display
- Remote control included
- 3D Air circulation via multidirectional oscillation
- Optional 4*2200mAH battery pack support
