

## 1.2 KVA Gasoline Generator

This gasoline generator is a portable power solution with an AVR alternator. It delivers 1200W starting watts and provides both AC and DC power outputs.

### Overview

#### Portable Gasoline Power Solution

This portable gasoline generator provides a reliable power solution featuring an integrated AVR alternator for stable output. Engineered for versatility, it delivers both AC and DC power, making it suitable for various small-scale energy requirements. With a robust 3.0HP engine and a maximum output of 1.2KVA, this unit is designed to meet quality standards while ensuring consistent performance.

### Technical Specifications

#### Engine Specifications

Feature	Specification
Engine Model	A156F
Engine Power	3.0 HP
Fuel Type	Gasoline

#### Electrical Output

- AC Output: 220V / 50Hz
- DC Output: 12V / 8.3A
- AVR Alternator Equipped

### Compliance & Features

#### Safety Features

Voltmeter • Circuit Breaker

#### Certifications

ISO 9001:2000
