

# 12-Ton Hydraulic Shop Press

This heavy-duty 12-ton shop press is designed for industrial and automotive applications. It features a robust steel frame and a hydraulic jack for controlled pressing operations.

## Overview

### Industrial Strength Hydraulic Press

This 12-ton hydraulic shop press is engineered for heavy-duty industrial and automotive tasks, offering reliable performance for bending, straightening, and pressing operations. Featuring a robust steel frame for maximum stability, this press is designed to withstand rigorous daily use in professional workshops and garages. The inclusion of an integrated safety overload valve ensures operational security, while the adjustable work table provides the versatility needed for various workpiece sizes.

## Technical Specifications

### Rated Capacity

**12 Ton**

Maximum Force

### Safety Features

- Safety overload valve
- Robust frame construction
- Controlled hydraulic operation

### Materials and Build

Heavy-duty Steel, Hydraulic System

## Usage and Application

### Primary Applications

- Bending
- Straightening
- Pressing
- Stamping

### Target Environments

Automotive Workshop • Industrial Garage • Professional Mechanics
