

12 x 1/4 x 3 Inch Grinding Wheel 46 Grit for Surface Tool Cutter Grinder

This grinding wheel measures 12 inches in diameter, 1/4 inch in thickness, and has a 3-inch center hole. Constructed with 46 grit abrasive, it is suitable for use with tool and cutter grinders.

Product Overview

High-Performance Grinding Wheel

This white aluminum oxide grinding wheel is engineered for precision tasks including surface, tool, and cutter grinding. It is specifically designed to handle high-hardness materials such as high-speed steel, high-carbon steel, hardened steel, and various alloy steels. With a 46 grit abrasive, it offers an optimal balance between efficient material removal and achieving a fine surface finish.

Technical Specifications

Grit Size	46
Diameter	12 inch
Thickness	0.25 inch
Center Hole Diameter	3 inch

Material & Compatibility

Application Types

Surface Grinding • Tool Grinding • Cutter Grinding

Abrasive Material	White Aluminum Oxide
Suitable Materials	High Speed Steel, High Carbon Steel, Hardened Steel, Alloy Steel

Customization

Available Custom Shapes

- Parallel Cup
- Cup Emery Wheel
- Cylinder
