

1200KW Industrial Diesel Generator Set

This is a 1200kW diesel generator set designed for industrial applications. It operates at 50Hz/60Hz, 230V/400V, 3P, with a 0.8pf.

Overview

High-Performance Industrial Power

This 1200KW industrial diesel generator is engineered for reliable power generation in the most demanding environments. Featuring a heavy-duty diesel engine and a high-efficiency alternator, it provides exceptional fuel economy and low emissions for critical operations. It serves as an ideal solution for industrial facilities, large-scale construction sites, and emergency backup power systems.

Technical Specifications

Rated Power Output

1200 KW
Rated Power

Ideal Applications

Industrial Facilities, Construction Sites, Emergency Backup

Performance Features

Performance Highlights

- Heavy-duty diesel engine construction
- High-efficiency alternator design
- Exceptional fuel economy
- Low emission output
