

1200W HMI Moving Head Stage Light

This moving head spotlight uses a 1200W HMI lamp to generate high-intensity light. It features 24 DMX channels for comprehensive control over various lighting parameters.

Product Overview

Professional HMI Moving Head Light

The 1200W HMI Moving Head Spot Light is a professional-grade lighting fixture engineered for demanding entertainment and stage environments. Featuring a high-intensity 1200W HMI lamp, this unit delivers exceptional brightness and precise color rendering for large-scale events. With motorized zoom, focus, and iris capabilities, alongside sophisticated gobo and color wheel options, it provides versatile control for concerts, theater productions, and television studios.
