Product Overview

High-Performance ARGB Cooling

This 120mm addressable RGB cooling fan is engineered for PC enthusiasts and gamers who demand both efficient thermal management and vibrant aesthetics. Featuring a super silent hydraulic bearing design, it delivers high airflow while maintaining minimal noise levels. With full motherboard synchronization support, users can easily customize lighting effects to match their system's style, making it an ideal upgrade for gaming rigs and high-performance workstations.

Technical Specifications

Fan Size	120 mm
Bearing Type	Hydraulic
Noise Level	Super Silent

Lighting & Compatibility

Lighting Type	Addressable RGB (ARGB)
Sync Capability	Yes
Compatibility	Motherboard Sync, PC Cases, CPU Coolers

Features

Key Features

- High airflow design
- Vibration dampening pads
- Addressable RGB lighting
- Silent operation
