

120mm Segmented Sintered Saw Blade for Tile Cutting

This blade is used for cutting various tile types, including polished porcelain, ceramic, and rustic tiles. Its design provides high sharpness, enabling flat cutting slots, reduced chipping, and long-lasting performance in both single and multi-blade setups.

Product Overview

High-Performance Tile Cutting

This 120mm segmented sintered saw blade is specifically engineered for professional-grade cutting of polished porcelain, rustic, and glazed wall or floor tiles. Designed for both manual and automatic cutting systems, it delivers high sharpness and clean, chip-free edges for superior finishing. Its durable construction ensures a long-lasting service life, making it a reliable choice for intensive tile installation projects.

Technical Specifications

Blade Diameter	120 mm
Model Number	SSBD03
