

120W LED Roadway Lighting Fixture

This LED roadway lighting fixture consumes 120W of power. It is designed for durable performance in street and highway lighting applications.

Overview

Durable LED Roadway Lighting

This 120W LED roadway lighting fixture is designed for modern outdoor infrastructure, combining aesthetic design with robust functionality. Engineered for durability and efficiency, the fixture features a specialized housing that protects the light source while optimizing light distribution. It is a reliable solution for street lighting applications requiring long-term performance and structural integrity.

Technical Specifications

Power Rating

120 W

Power Consumption

Housing Capabilities

- Protects light bulb from damage
- Optimized for light gathering and distribution
- Durable construction for extended service life

Application

Roadway Lighting, Street Lighting, Outdoor Lighting
