

12/24V Smart Battery Charger with LCD Screen

This smart battery charger is designed for 12V and 24V batteries. It features an LCD screen for displaying charging information and offers intelligent charging algorithms to optimize battery life and performance.

Overview

Intelligent Battery Charging Solution

This smart battery charger is designed for both 12V and 24V battery systems, providing a versatile solution for automotive and industrial needs. It features an integrated LCD screen that displays real-time charging information, while intelligent algorithms work to optimize battery life and performance. Built with comprehensive safety measures, it ensures reliable operation for lead-acid, AGM, and gel battery types.

Technical Specifications

Supported Battery Types

- Lead-acid
- AGM
- Gel

Voltage Compatibility	12V, 24V
Display	LCD Screen

Safety & Features

Safety Protections

Reverse Polarity Protection • Overcharge Protection • Short Circuit Protection

Connectivity

Included Accessories

- Battery clamps
- Ring terminals
