Overview

Professional Grade Planing

This 12.5-inch portable thickness planer is designed for professional woodworking applications, offering a robust 1500W motor to handle demanding projects. It features a precise planing width of 318mm and adjustable cutting depth, ensuring consistent material thickness across the entire length of the board. Built for efficiency and stability, this tool is an essential addition to any workshop requiring accurate wood dimensioning.

Technical Specifications

Input Power

1500 W
Power

Blade Speed 9000 rpm

Feeding Speed 8 m/min

Capacity

Max Cutting Width 318 mm

Max Cutting Depth 2.5 mm

Thickness Range 5 - 153 mm

Electrical

Voltage & Frequency 110-120V, 50/60Hz
