

# 1250 lb Engine Stand

This heavy-duty 1250 lb engine stand is designed to securely hold and rotate engines during repair or assembly. Constructed from robust steel, it features a sturdy base with swivel casters for easy maneuverability.

## ADDITIONAL IMAGES

## Overview

### Professional Engine Support

This heavy-duty engine stand is engineered to provide secure support and 360-degree accessibility for engines and gearboxes during repair or assembly. Constructed from durable carbon steel with a corrosion-resistant powder coating, it features an extra-wide base for maximum stability and rigidity. Designed for workshop efficiency, the stand includes adjustable mounting arms and smooth-rolling casters for easy maneuverability.
