

1250W Industrial Angle Grinder

This angle grinder is a professional-grade power tool suited for demanding industrial tasks. It operates on 220-240V/50Hz and provides 1250W of power, achieving a no-load speed of 10000r/min with a 100mm disc capacity.

Product Overview

Industrial-Grade Performance

This 1250W industrial angle grinder is engineered for demanding professional applications, specifically excelling in concrete slotting tasks. It features a compact fuselage design that maintains high power output while ensuring a long service life. With built-in dustproof and windproof protections, as well as advanced load protection to prevent burnout, this tool is built for reliability and safety in rigorous work environments.

Technical Specifications

Input Power

1250 W
Power

No-load Speed	10000 r/min
Disc Size	100 mm
Voltage/Frequency	220-240V/50Hz

Features

Key Features

- Compact fuselage design
- Optimized for concrete slotting
- Dustproof and windproof construction
- Multi-gear speed regulation
- Overload protection against motor burnout

Certifications

Compliance	CE, ITS
