

125A Electrical Isolator Switch

This compact isolator is designed for electrical power transmission and distribution systems. Rated for up to 125A, it provides reliable isolation in circuits up to 400V AC22A.

Product Overview

Compact Electrical Isolation

This modular isolator switch is designed for reliable power transmission and distribution systems. Engineered for safety and efficiency, it supports circuits up to 400V and is compliant with IEC60947-3 standards. Its compact 18mm modular design makes it suitable for a wide range of industrial and commercial electrical applications.

Technical Specifications

Rated Current

125 A

Max Rated Current

100 A

Standard Rated Current

Number of Poles	2P, 3P, 4P
Voltage Rating	400 V
Modular Width	18 mm

Installation

Busbar Compatibility

- U type solid busbar
- Pin type solid busbar

Mounting	35mm DIN rail
----------	---------------

Compliance & Standards

Compliance

IEC60947-3 • AC22A
