Product Overview

High-Performance Cylinder Barrel

This high-performance 125cc big bore single cylinder barrel is precision-engineered specifically for the Yamaha YBR125 motorcycle. Designed to enhance engine displacement, this component delivers increased power and torque for improved overall performance. Built for durability and reliability, it features enhanced cooling fins to ensure efficient heat dissipation even under demanding riding conditions.

Technical Specifications

Cylinder Bore Size	54 mm
Engine Displacement	125 cc
Compatibility	Yamaha YBR125

Key Features

Performance Benefits

- Enhanced engine displacement
- Increased power output
- Improved torque
- Enhanced cooling fins for heat dissipation
- Precision-engineered fitment
