

125cc Standard Motorcycle for Daily Transportation

This standard motorcycle is equipped with a 125cc engine, suitable for everyday commuting. It features a tubular steel frame, telescopic front forks, and dual rear shock absorbers.

Overview

Reliable Daily Transportation

The JL125-6 is a standard motorcycle engineered specifically for efficient urban commuting and everyday transportation. Built with a robust tubular steel frame and a reliable 125cc engine, it balances durability with ease of handling. The design prioritizes rider comfort, featuring a dual-seat configuration and a suspension system optimized for city roads.
