Overview

Reliable Power Solution

This 125KVA diesel generator is a robust and efficient power generation solution designed for both prime and standby applications. Engineered for durability, it features a high-quality alternator and a powerful engine to ensure stable and consistent energy delivery. Housed in a soundproof canopy, this unit is suitable for industrial, commercial, and residential use, providing quiet operation and ease of maintenance.

Key Features

Design Highlights

- Soundproof enclosure for noise reduction
- Comprehensive control panel for monitoring
- Engineered for easy maintenance and serviceability
- Durable construction for protection from elements

Suitable Applications

Industrial, Commercial, Residential, Prime Power, Standby Power
