

125mm Angle Grinder

This angle grinder is a robust power tool designed for grinding, cutting, and polishing various materials. It features a high-performance motor for efficient material removal and durable construction for an extended service life.

Overview

Professional Performance Angle Grinder

The 125mm Angle Grinder is a robust power tool engineered for demanding grinding, cutting, and polishing tasks across various materials. Featuring a high-performance motor, it delivers efficient material removal while maintaining durable construction for extended service life. The ergonomic design prioritizes user comfort, reducing fatigue during prolonged professional or DIY applications.

Technical Specifications

Disc Diameter	125 mm
Model Number	S1M-DB14-125E

Features & Safety

Safety Features	Safety Guard, Debris Protection, Spark Protection
Ergonomics	Yes

Applications

Primary Applications

- Grinding
- Cutting
- Polishing
