

125mm Diamond Cutting Disc for Angle Grinders

This professional-grade diamond cutting disc is designed for dry cutting applications. Its segmented rim ensures efficient material removal and fast cutting speeds on materials like concrete, stone, and tile.

Overview

Professional Dry Cutting Solution

This 125mm diamond cutting disc is engineered for high-performance dry cutting applications on demanding masonry materials. Its segmented rim design facilitates rapid material removal and efficient cooling, ensuring fast cutting speeds without the need for water. Perfect for professionals, it delivers clean, precise results on concrete, stone, and ceramic tiles.

Technical Specifications

Cutting Method

Dry Cutting

Diameter

125 mm

Arbor Size

22.23 mm

Application

Compatible Materials

Concrete, Stone, Ceramic Tile, Masonry

Primary Use

Wall trough cutting and general masonry work

Performance Features

Key Features

- Segmented rim for efficient material removal
- High-quality diamond grit for extended blade life
- Designed for minimal chipping
- Fast cutting speeds
