Product Overview

High-Performance Diamond Grinding

This 125mm diamond grinding cup wheel is engineered for efficient material removal and surface preparation on demanding surfaces like concrete, clinker, and natural stone. Featuring a double-row segment design with 9 segments, it ensures rapid stock removal and durability for professional applications. Built to withstand high-intensity use, this tool delivers consistent results for surface leveling and edge grinding.

Technical Specifications

Dimensions

125 mm
Diameter

22.23 mm
Bore Size

Performance Metrics

12200 RPM
Max RPM

80 m/s
Max Velocity

Segment Configuration

- 9 segments
- Double row design
- Segment size: 5 x 7.5 mm

Material & Quality

Material Properties

Property	Value
Diamond Concentration	25%
Grade	JR4
Hardness	16-17 kg

Disc Color

Red

Compatible Materials

Concrete, Clinker, Natural Stone
