

125mm Super Thin Diamond Cutting Blade for Tile

This diamond cutting blade is designed for precision cutting of porcelain, ceramic tile, and marble. The super-thin profile minimizes chipping and ensures clean cuts, while the turbo rim design provides efficient material removal.

Product Overview

Precision Cutting Performance

This 125mm super-thin turbo diamond blade is engineered for high-precision cutting of demanding materials like porcelain, ceramic tile, and marble. Featuring a reinforced core and a specialized turbo rim, the blade delivers smooth, efficient material removal while minimizing chipping. It is a versatile tool suitable for both wet and dry applications, ensuring reliability for professional trade use.

Technical Specifications

Safety Standards

EN13236

Diameter	125 mm
Maximum RPM	12250 RPM
Cutting Method	Dry Cutting, Wet Cutting

Applications

Material Compatibility

- Porcelain
- Ceramic Tile
- Marble
